Mosquito Control Prep Sheet

Triangle Pest Control is one of the top mosquito control exterminators in the Raleigh Durham area.

Our company has been rated the #1 pest control service provider by our customers. We believe that this rating is because we offer excellent customer service and we solve our customer's pest, mosquito and termite issues cost effectively.

Our company has developed a series of customer preparation sheets that you can use to get the most from our service. Of course, there is no requirement that you complete this checklist prior to our arrival; however, we have found that the customers who do complete this checklist get the maximum benefit of our service.

In general our mosquito service does not require much effort from you. Your preparation requirements are minimal. In most cases, all you will need to do is ensure that your yard is clean and ready for our treatment. Use this checklist to ensure that you will get the most from our treatment.

Items to complete prior to our arrival

- DO** pickup all children toys and store away from areas that will be treated (foundation walls, fence lines)
- DO** move pets to an area that will not be treated (prior to application)
- DO** be prepared to leave if necessary. In most cases you do not need to leave during the treatment; however, it never hurts to be prepared should you need to
- DO** be prepared to make payment. We require payment at the time of service
- DO** plan to be at your home if we are performing an initial service or a one-time treatment.

After our treatment

- DO** allow at least 15-30 minutes for the treated areas to dry
- DO NOT** use other methods for mosquito control (such as mosquito magnets)

Tips to help keep your yard stay mosquito free

- Keep your gutters clean and free from debris
- Ensure that your downspouts are clean and installed properly
- Avoid storing things on your property that can hold water (like tires and barrels)
- Cut away tree limbs and foliage so that no limbs or branches are touching your home
